

Welcome to Jekyll & Hyde Ultimate Overdrive!

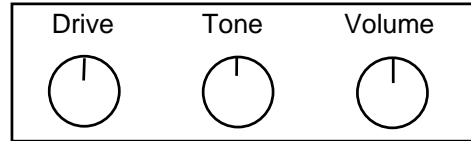

Ver. 06/05

There has never been an overdrive pedal quite like this one. Two separate overdrives in one pedal, each with separate controls, but with the ability to use them individually or together. The Jekyll half is designed to accurately reproduce the sound of the TS-808 original TubeScreamer, but with more volume potential. Hyde is a heavier distortion with more bottom end and is extremely versatile. Not just a "Turbo" version of Jekyll, Hyde has a wide range of sounds that can be discovered by using the EQ knob to scoop out the midrange or add more, a Sharp/Blunt switch to go from a more compressed distortion to very bright, and the usual Drive, Tone, and Volume knobs to set the overall style of sound. With the ability to use both halves separately or together, the sonic possibilities are endless. Following are some settings to get you started: (Use Visual Sound 1 SPOT, Ibanez, Dunlop, Boss PSA, Morley or other regulated 9VDC center negative polarity adapters, or 9V alkaline battery.)

Jekyll:

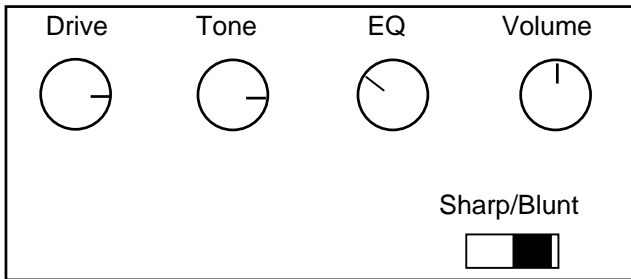

HARD & CRISP CRUNCH

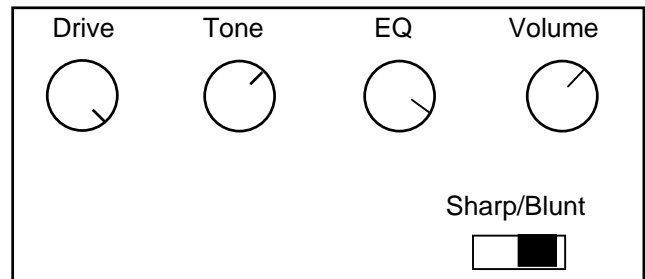

MELLOW BLUES

NOTE: Unless otherwise shown, Bass Boost is OFF.

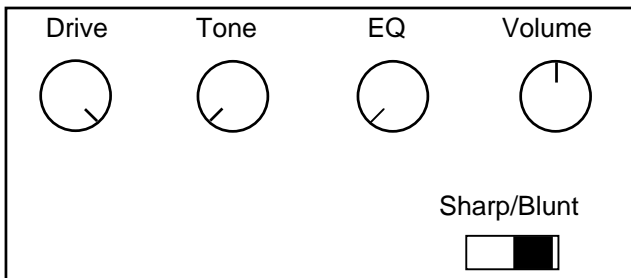

Hyde:

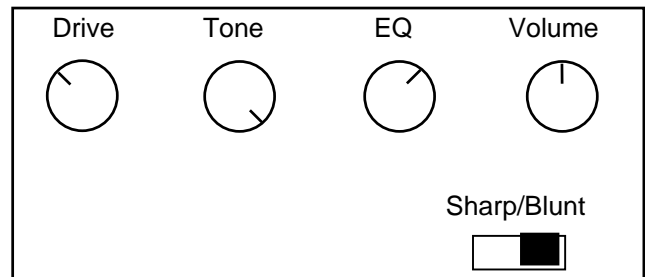

CLASSIC HARD ROCK

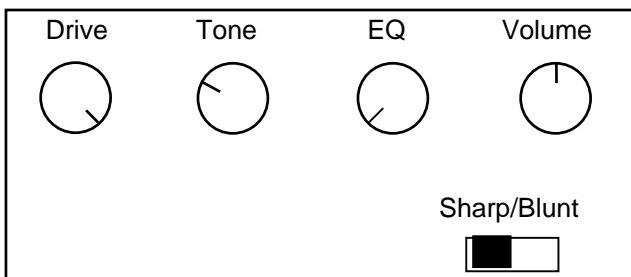

METAL MADNESS

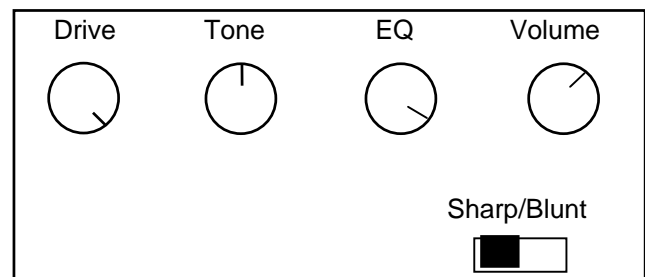

ZZ DISTORTION

BIG FAT BLUES

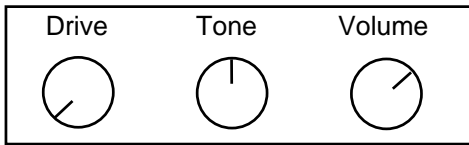

BRITISH STACK

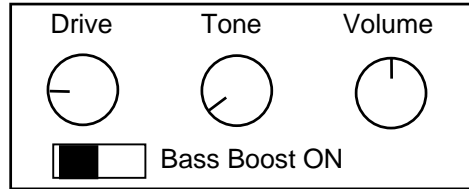

BUZZ BOMB

More Settings...

Jekyll:

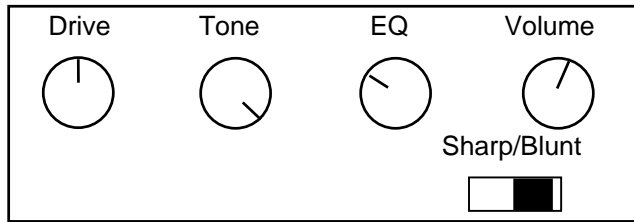

SLIGHTLY SOILED BOOST

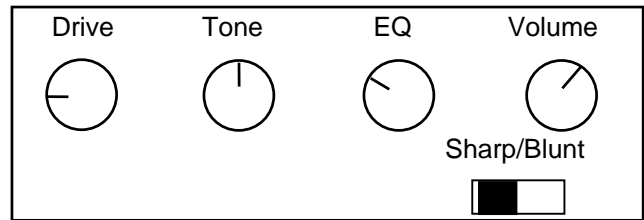

BROKEN UP JAZZ

Hyde:

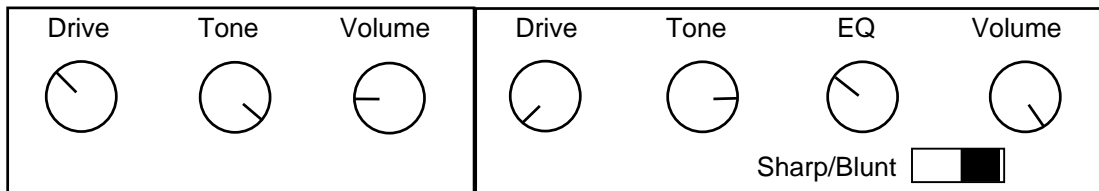

SOUTHERN ROCK

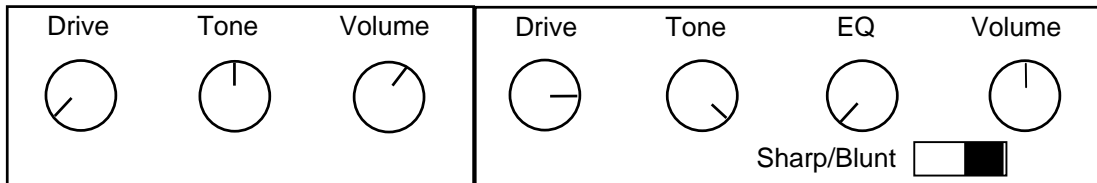

NECK PICKUP BLUES

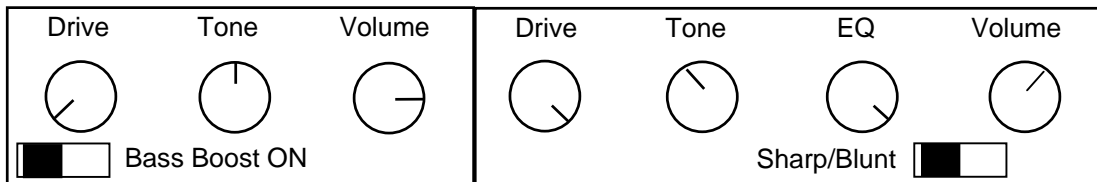

Jekyll & Hyde Together:

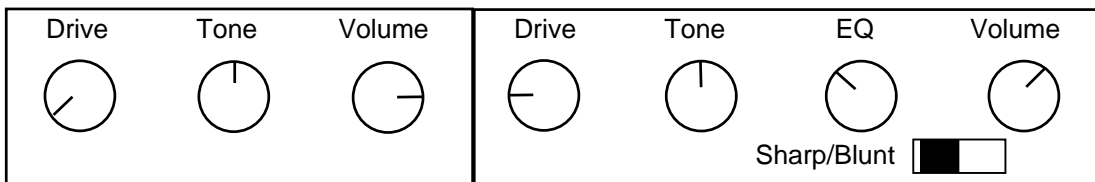

THICK FUZZ (For even better results, combine with Route 66 compressor)

PURE POWER

METAL SOLO BOOST

HOT BLUES

Beware using Jekyll & Hyde together with both Drive knobs all the way up as it may cause feedback.
 All Visual Sound pedals are warranted for 1 year from purchase. If you ever have any problems or questions, just call 800-686-3317
