

# Take a drive on ROUTE 66!

Ver. 03/04

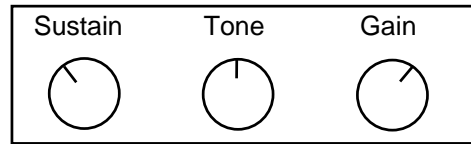

Route 66 American Overdrive is sure to become as legendary as its namesake. With classic compression combined with classic overdrive (just like an old TS-808 Tubescreamer), the Route 66 pedal gives you two great effects for the price of one. The two effects sound great on their own and can also be combined to compliment one another. In fact, probably the only complaints about the original Tubescreamer was that it did not have much sustain or bottom end. That won't be a problem with Route 66. Just combine the overdrive channel with the compression channel to get all the sustain you want. Add the Overdrive Bass Boost and give it that big cabinet sound. We've even boosted the volume output of the 808 sound without compromising the tone, so crank it up and enjoy!

If you love the clean sound of your guitar and amp, but just want a clean boost, kick in the compressor with the Gain knob up a bit. We've added a pre-amp stage to the compressor to allow for a truckload of gain, with or without overdrive. Using Route 66 American Overdrive with a good tube amp is sure to make it sing! Following are some settings to get you started: (Use Visual Sound, Ibanez, Dunlop, Boss PSA, Morley or other regulated 9VDC center-negative polarity adapters, or 9V alkaline battery.)

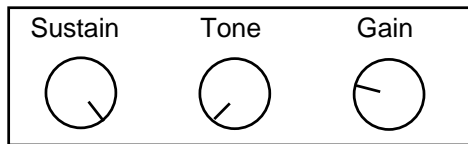

## Compression:

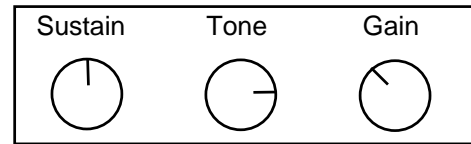

**SWEET SUSTAIN**

**CLEAN BOOST**

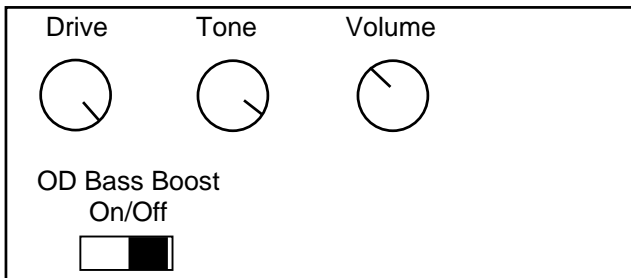

**DYNA ROSS**

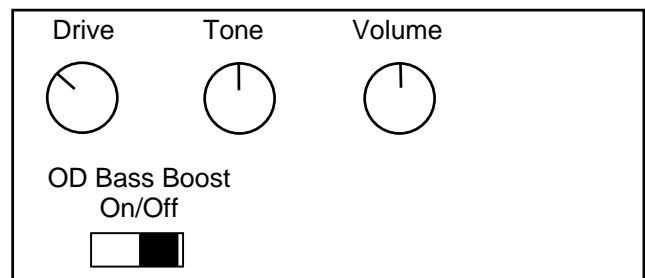

**ULTRA BRIGHT**

NOTE: The compressor can be used with the Tone control "Off" if you prefer.

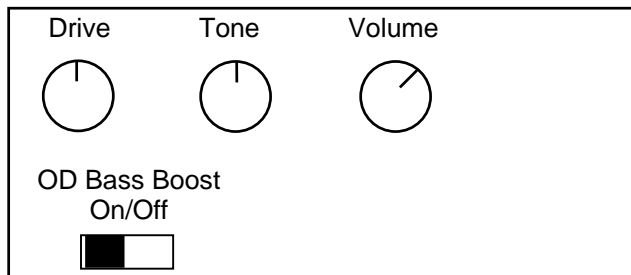

## Overdrive:

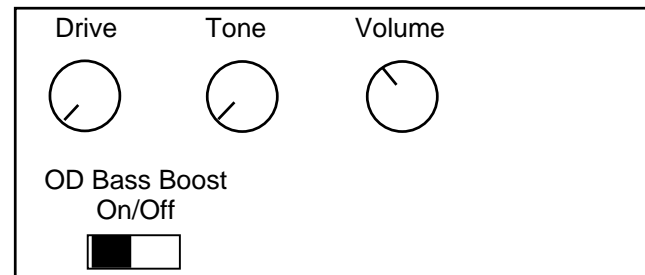

**HARD & CRISP CRUNCH**

**MELLOW BLUES**

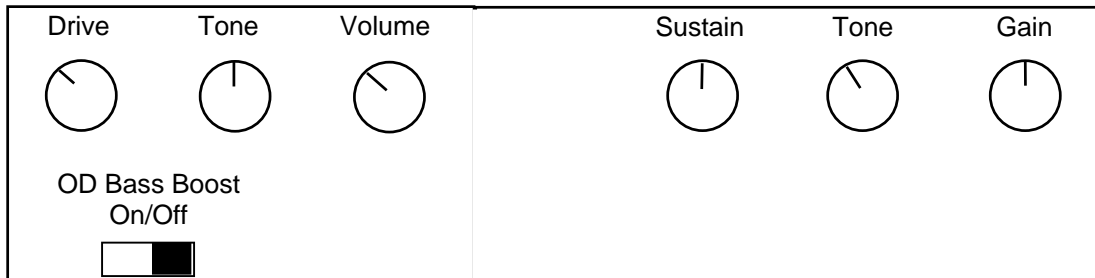

**BIG FAT BLUES**

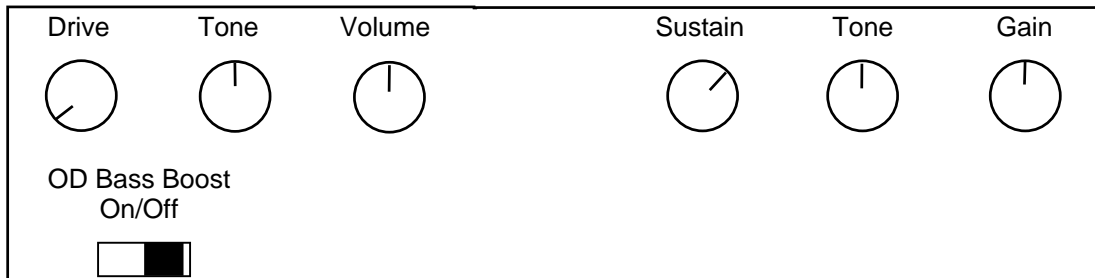

**BROKEN UP JAZZ**

Route 66 American Overdrive sample settings (cont.):

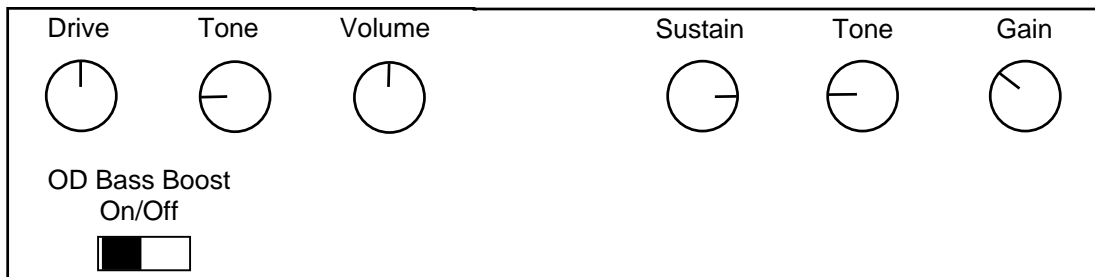

## Combinations:

SQUASHED SCREAMER

TUBE PUSHER

WOODSTOCK

Drive carefully when using Overdrive and Compression together. With Drive and Sustain knobs all the way up, you will probably experience feedback. So, unless that's what you're after, don't do it. All Visual Sound pedals are warranted for 1 year from purchase. If you ever have any problems or questions, just call 800-686-3317 (USA only) or e-mail [service@visualsound.net](mailto:service@visualsound.net).
